

DISTRICT ORGANIZATIONAL PLAN FOR IMPROVING CURRICULUM

The Board of Education of the Sharon Springs Central School District supports and encourages development of a curriculum that conforms to Federal and State mandates as well as reflects the community's ideals and needs.

The district-wide curriculum shall be sufficiently flexible to meet the life long needs of our children in a rapidly changing society.

The administration, teachers, parents, community members, and students (where possible) will be responsible to the Superintendent for developing district-wide efforts toward the short and long-range improvement of curriculum and instruction.

The use of current research and theory as well as needs assessments will be used, whenever possible, in curriculum improvement.
