

DISTRICT ORGANIZATIONAL PLAN FOR IMPROVING CURRICULUM

The Board of Education of the Sharon Springs Central School District supports and encourages development of a curriculum that conforms to Federal and State mandates as well as reflects the community's ideals and needs.

The district-wide curriculum shall be sufficiently flexible to meet the life long needs of our children in a rapidly changing society, through integration of modern technologies across the entire curriculum.

The administration, teachers, parents, community members, and students (where possible) will be responsible to the Superintendent for developing district-wide efforts toward the short and long-range improvement of curriculum and instruction.

The use of current research and theory as well as needs assessments will be used, whenever possible, in curriculum improvement.
