

PLACEMENT OF STUDENTS

The learning experiences of each student of the Sharon Springs Central School District should promote continuous progress throughout the student's public school career.

Whenever possible, student placements shall be determined in such a way as to provide an environment best suited to each student's individual learning needs. Factors such as the student's intellectual, social, and emotional needs are among the criteria considered essential for making such decisions. In deciding upon the proper placement, the combined resources of the professional staff, the parents or guardians, and the students shall be used.

In the event a conflict exists as to the best placement of a student, the ultimate decision shall rest with the Superintendent or a designee.
