

RECRUITMENT AND TRAINING OF DRIVERS

Because of the great importance of the driver's function, the best available people will be recruited for school bus drivers. In addition to meeting all of the qualifications prescribed by the Commissioner of Education, and the State Department of Motor Vehicles, all new drivers will receive instructions in the operation before driving with students aboard, as well as being made aware of pertinent District policies. All new drivers will be required to take the bus drivers in-service training course required by law.
